#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract contains phrases, such as "the invention is directed to" and "the object of the invention."

### ***Claim Objections***

2. Claims 1-27 are objected to because of the following informalities: Claim 1 contains the phrase "particularly" and "suitable", which make the claim indefinite, for it is unclear whether the elements following these phrases are positive limitations in the claim or are merely exemplary enumerations; in claims 2, 3, 12, 21, 25 it is unclear whether the claimed "measuring devices" are the same as the measuring devices claimed in claim 1 or are entirely different separate measuring devices; in claims 18, 22, 24 it is unclear whether the claimed "actuating elements" are the same as the actuating elements claimed in claim 1 or are entirely different separate actuating elements.

Appropriate correction is required.

The rest of the claims are objected to as being dependent from an objected claim.

***Allowable Subject Matter***

3. Claims 1-27 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: There is no evidence in the prior art searched of an arrangement for the stabilization of the radiation emission plasma (EUV radiation) as claimed.

***Conclusion***

5. This application is in condition for allowance except for the above listed formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
